Issued: 20/2/1964

Copy No: 201

WAVELENGTHS AND COMMUNICATIONS WITH AIRCRAFT (1964)

From: MOSCOW

To: STOCKHOLM

No: 117
4764
5 Jan. 64

To ORN. (1)

Reference your No. 45.(a)

Of the wavelengths proposed by you for the check flights [KONTROL'NYJ VYLET], we can only work on [the third]. In future do not transmit any programmes to the aircraft [b]; in cases of absolute necessity, ask us. The wavelengths proposed by you for [the working] schedules [SEANS], do not [ensure] air communication [VOZDUSHNAYA SVYAZ']. [c] From [1 group unrecovered] [d] we shall work at the time proposed by you. Our wavelengths by day 00/00; yours 00/20. Our wavelengths by night [00 67]/[00 73]; yours 00/[00 72]. [e] Callsigns and [3 groups unrecovered] indicated by you.

No. 765[f]

DIRECTOR

- Notes: [a] Not available. ~~This is the number as given but is far too high for such an early date in January. STOCKHOLM's internal numbers were rising by approximately 50 a month at this time.~~
- [b] Aircraft is in the plural.
- [c] This term generally refers to communications flights but in this context it presumably means either ground to air or air to air communications.
- [d] Date in January.
- [e] Each asterisk represents an unrecovered digit. The oblique stroke may not have been correctly identified but its purpose - to separate alternative wavelengths - seems clear.

Distribution

[Note (f) and Comments overleaf]

~~TOP SECRET~~

2

3/NBF/T1629

Note: [1] This internal serial must also be wrong. MD8000's rate of use of internal serials appears to be approximately 800 per month at this time.

Comment: [1] ORN : Probably Lt. Col. Serafim PINYUGIN, Soviet Assistant Military and Air Attaché in STOCKHOLM.

3/NBF/T1629
